## WORK PERFORMED

1.) I walked the perimeter of the site to check for any E&S issues and there were none apparent at this time.
2.) Excavation began today near the existing chain link fence located behind the existing Press Box.
3.) The existing chain link fence in this same area was cut and removed to allow access for the excavation equipment to work in this area.
4.) Test Pits were dug today and soil samples were taken and sent out for analysis.
5.) Installation began today on the proposed Temporary Embankment Sediment trap along the third base line of the existing softball field.
6.) Silt Fence was temporarily installed in place of the proposed 12" Composite Filter Sock (CFS-06) but will be replaced on Tuesday March 15, 2016 per the notification from Torcon.
