WORK PERFORMED

1.) JJD worked on grading for more of the proposed curb. They continue to grade and prep for Roma to continue with curb installation pending weather.
2.) I walked the entire site to check on all installed E&S controls which all appear functional at this time.
3.) Brightline continued to remove the foam paneling used in construction of the proposed retaining wall. This is very slow work but it is important to get the concrete surface clean and clear of all paneling and make the surface rough so that the proposed rock face can adhere to the wall upon installation.
4.) HB Frazier and CQI continue with electrical installation for the existing Halls.
5.) Roma Concrete was onsite today and poured 500' of curb. The curb installed is between Moriarty Hall & Griffin Hall with some directly behing Griffin Hall.
