PUBLISHED COMMENTS

46.1144 - The retail food facility operator failed to notify the Department of an imminent health hazard, unsafe presentation and handling of food and food products, and discontinue operations.

Along with the health code violations, I've listed below the building code violations that must be corrected before re-opening:

- 1. The vent hood exhaust fan was repaired by an unlicensed commercial mechanical contractor. The vent hood needs to be certified that it is in good working condition.
- 2. The cooking appliances under the Ansul system appear to have been moved. This may compromised the effectiveness of the Ansul system. The Ansul system will need to be certified for compliance.
- 3. The 2 burner cook top is not secured to its base and easily topple over. This was noted on a previous inspection. This must be corrected.
- 4.The 3 bay sink is clogged and not draining properly.

 5.The flooring has deteriorated even more from the last site inspection. It represents a tripping hazard in the kitchen area, and needs to be corrected.

Please call our office to schedule a re-inspection once ALL violations are corrected.
