Hazardous Tree Removals

Approved for removal by Township Arborist

334 Bailey Road

Approved for removal

16" dbh Red Maple Acer Rubrum 40' tall

Tree roots have raised the sidewalk creating a hazardous condition. Tree is under stress and is in a state of decline.

105 Highfeild Road

Approved for removal

1-23" White Ash; 1-12" Ash; 2-32" White Ash

12" Ash is standing dead and is vine covered, proposed hazard to multiple targets; other Ash are in declining health. These trees are not scheduled for EAB treatment and will continue to decline.

520 Meadowbrook Circle 40 dbh 80ft Pin Oak Tree is hazardous- ¾ dead	Approved for removal
293 Upper Gulph Road 34" White Oak Tree is showing tip die back in the upper canopy. Tree is in a decline spiral	Approved for removal – 3 replacement trees to be planted
293 Upper Gulph Road 34" Black Oak Tree has bacterial leaf scorch and is in decline	Approved for removal – 3 replacement trees to be planted
235 Hardwicke Lane 40" White Oak Tree is dead-hazardous	Approved for removal
821 Milmar Road Large 28-32" dbh Tulip Poplar Root system has been compromised by recent excavation near the roots. Tree has the high potential to uproot and/or decline in health.	Approved for removal
734 Woodcrest Road 39" Beech Tree Tree has bad branch attachment and is hazardous.	Approved for removal
441 Iven Avenue 30" Red Oak Tree has decay in root flare resulting from old driveway excavation. Tree leans toward house.	Approved for removal
130 Browning Lane 31" White Pine 33" White Pine Both trees are very close to the house. Each has poor structure, weakly attached multiple leaders and history of storm damage. One of them overhangs the neighbor's property.	Approved for removal
767 Woodlea 60' Norway Maple 38" dbh Tree is split at the trunk	Approved for removal
792 Woodlea 34" Oak Tree 60' tall Tree is dead	Approved for removal
22 Meadow Road Norway Maple	Approved for removal

20 Aldwyn Lane

Ash Tree

Split at crotch/rotted and unstable

Approved for removal

503 Hilaire Road

36" Sugar Maple

Major decay at base. Canopy is 65% dead.

Approved for removal
